

Professional development: What are your priorities?

May 25, 2011

In the recently negotiated collective agreement covering health science professionals working in hospitals and communities around the province, a \$450,000 professional development fund was established for use by members over the term of the collective agreement.

Following ratification of the agreement, a joint committee of the Health Science Professionals Bargaining Association (HSPBA) and Health Employers Association of BC (HEABC) was established to develop priorities and terms of reference for the fund.

The committee is now seeking input from members about your professional development needs and priorities. Questions to consider include:

- What are your professional development needs?
- What obstacles do you face in obtaining professional development?
- What should be the priorities for professional development among health science professionals?

The committee values your input. Please send your feedback by Friday, June 17, 2011 to pd@hsabc.org.
