

Moji Borairi

Dear friends and HSA members in Region 3,

My name is Moji Borairi, I am a Cardiac Ultrasound and Medical Radiation Technologist working in Burnaby Hospital. For the past 20 years I have been providing compassionate services in Diagnostic Medical Imaging alongside with you and have gathered extensive work experiences in many regions in our province. My travels and work experiences in Fraser Health, Vancouver Health, and Interior Health Authorities have given me a wide exposure to the different aspects of our healthcare system, from the very small sites to the much larger facilities throughout the province.

My primary goal as a nominee to become your Board Director in Region 3 is to address your work related concerns such as fair wages, reasonable and safe workload along with many other issues that affects your well being and the quality of your work life.

As a HSA member and a health care provider, I urge you to get involved and be part of the change you would want to see in your workplace and beyond. Together, we can create a more pleasant and respectful environment to help reach our common goal of creating a healthy and vibrant society for all to enjoy.

Your inclusiveness and participation is vital now and is much needed to create feedback for leaders to make the necessary changes you would like to see.

Thank you and it's been an honor to serve alongside with you.

Much Regards,
Moji Borairi, RDCS
